Property 3: Hellas Basin Logistics Complex, Depot Gamma (Industrial)

Commercial Pressurized Space Lease Agreement

LANDLORD: Ares Prime Yield Fund I, LP, a Martian limited partnership
TENANT: Phobos Minerals Extraction Group, a Martian public limited company

---

COMMERCIAL PRESSURIZED SPACE LEASE AGREEMENT

THIS COMMERCIAL PRESSURIZED SPACE LEASE AGREEMENT (this **"Lease"**) is made and entered into this March 1, 2084, by and between **Ares Prime Yield Fund I, LP**, a Martian limited partnership (hereinafter referred to as **"Landlord"**), and **Phobos Minerals Extraction Group**, a Martian public limited company registered under Registry No. MP-44021-I (hereinafter referred to as **"Tenant"**).

WITNESSETH:

ARTICLE 1: PREMISES, TERM, AND RENT

- **1.1. Premises:** Warehouse C, Hellas Basin Logistics Complex, Dome 3, Ares Prime, containing approximately 25,000 square meters of unpressurized and partially pressurized heavy industrial warehouse space (the **"Premises"**).
- **1.2. Term:** Ten (10) Martian Years, commencing on March 1, 2084 (the **"Commencement Date"**), and expiring on February 28, 2094 (the **"Expiration Date"**).
- **1.3. Base Rent:** Initial Base Rent shall be Four Million Five Hundred Thousand Martian Credits (M$ 4,500,000.00) per annum (representing M$ 180.00 per sq.m.), payable in monthly installments of Three Hundred Seventy-Five Thousand Martian Credits (M$ 375,000.00).

ARTICLE 2: INTERPLANETARY FREIGHT INDEX ESCALATIONS

- **2.1. Escalation Formula:** On each biennial anniversary of the Commencement Date, the Base Rent shall escalate based on the average percentage change in the Mars-Earth Trade Index (METI) cargo freight tariff rates over the preceding twenty-four (24) Martian months; provided, however, that in no event shall any such biennial escalation be less than two percent (2.0%) or greater than six percent (6.0%) per annum, compounded.

ARTICLE 3: TENANT IMPROVEMENTS AND CONCESSIONS

- **3.1. Structural Retrofit TI Allowance:** Landlord shall provide Tenant with a TI Allowance of One Million Five Hundred Thousand Martian Credits (M$ 1,500,000.00) (M$ 60.00 per sq.m.) for structural flooring reinforcement to support heavy vibrating ore crushers and the installation of secondary high-capacity electrostatic dust-containment systems.
- **3.2. Solar Storm Abatement:** Due to a verified Class-X Solar Storm causing severe atmospheric ionization and construction delays at the Hellas Basin site, Landlord grants Tenant a one-time deferral and full abatement of the Base Rent due for the first (1st) Martian month of the Term.

ARTICLE 4: TRIPLE-NET (NNN) INDUSTRIAL RECOVERIES

- **4.1. Heavy Filtration and Power Draw:** Tenant shall pay 100% of all utility and maintenance costs for its manufacturing operations. This includes the full costs of maintaining industrial-grade particulate filtration systems required by the Martian Environmental Protection Council and the heavy-draw fusion-grid power consumption of Tenant's ore processing units.
- **4.2. Base Building Maintenance Exclusions:** Landlord shall maintain the structural integrity of the outer basalt foundation slabs and primary anchor cables. Any damage to the anchor structures caused by internal mining machinery vibration shall be remediated by Tenant at its sole cost.

ARTICLE 5: EARLY TERMINATION OPTION

- **5.1. Orbital Window Termination Option:** If the Interplanetary Aviation Authority reduces commercial launch window capacities between Mars and Earth by more than fifty percent (50%) over any consecutive twenty-four (24) Martian month period, Tenant shall have a one-time option to terminate this Lease at the end of Lease Year 5. Tenant must provide nine (9) Martian months' prior written notice and pay a termination fee equal to twelve (12) months of the unamortized TI Allowance plus six (6) months of Base Rent.

ARTICLE 6: AMENDMENTS AND SIDE LETTERS

- **6.1. Side Letter No. 1:** Pursuant to Side Letter No. 1, executed concurrently herewith, Landlord grants Tenant a non-exclusive license to utilize up to 5,000 square meters of unpressurized surface easement adjacent to Warehouse C for the storage of unrefined regolith tailings, provided such tailings are anchored beneath approved magnetic dust containment blankets.

IN WITNESS WHEREOF, the parties have executed this Lease as of the date first above written.
