SET 1: THE KRAKEN MARE HYDROCARBON EXTRACTION & REFINING DOME

DOCUMENT 1A: SECURED CREDIT AGREEMENT

SECURED CREDIT AGREEMENT

Dated as of the Agreement Effective Date (as defined herein)

among

KRAKEN EXTRACTION PHASE II LP,
as Borrower

and

THE FINANCIAL INSTITUTIONS PARTY HERETO FROM TIME TO TIME,
as Lenders

and

SOL-SYSTEM INFRASTRUCTURE BANK (SSIB),
as Administrative Agent and Collateral Agent

ARTICLE I: DEFINITIONS AND ACCOUNTING TERMS

Section 1.01. Defined Terms. As used in this Agreement, the following terms have the meanings specified below:

- **"Agreement Effective Date"** means the date on which this Agreement has been fully executed and delivered by all parties hereto, which date shall be the date written next to the last signature in the signature block below (such date, the **"Signature Date"**).

- **"Atmospheric Integrity Rating"** means the structural safety rating of the primary containment dome at Kraken Mare, as measured by the Titan Regulatory Council (TRC) using the barometric differential index.

- **"Cryo-Containment Failure"** means any thermodynamic drift in the secondary holding tanks exceeding 5.0 Kelvin above nominal liquid methane storage temperatures (91.1 K).

- **"Dome"** means the Kraken Dome Sector-4 pressurized facility, located at latitude 68.3° N, longitude 310.1° W on Titan, Saturn.

- **"Energy Equivalent Value"** or **"EEV"** means the energy value of refined hydrocarbon product calculated in Megawatt-hours equivalent (MWe) per metric ton of liquid methane/ethane mixture.

- **"Methane Export Price Index"** or **"MEPI"** means the volume-weighted average price per metric ton of liquefied natural gas delivered *FOB orbit* (Titan orbital transfer station L-5) as published daily by the Sol System Commodity Exchange.

- **"Sol System Interstellar Accounting Standards"** or **"SSIAS"** means the body of accounting principles, standards, and interpretations adopted by the Interstellar Board of Standards, as in effect from time to time.

- **"TIDOR"** means the Titan Inter-Dome Offered Rate, the average interest rate at which major Titan-based financial institutions offer to lend unsecured funds to other banks in the Titan system.

Section 1.02. Accounting Terms. Except as otherwise expressly provided herein, all financial terms and ratios shall be calculated, and all financial statements shall be prepared, in accordance with SSIAS.

ARTICLE II: THE CREDIT FACILITY

Section 2.01. Commitment. Subject to the terms and conditions set forth herein, each Lender agrees to make loans (each a "Facility Loan") to the Borrower from time to time during the Availability Period in an aggregate principal amount that will not result in such Lender's Credit Exposure exceeding such Lender's Commitment. The aggregate principal amount of the Facility is **2,500,000,000 Sol Credits (SC)**.

Section 2.02. Interest Rates.

1. The Loans shall bear interest at a floating rate per annum equal to **TIDOR plus 4.50%** (the "Applicable Margin").

2. If the Borrower fails to maintain an **Atmospheric Integrity Rating** (as defined in Section 1.01 and determined by the TRC) of Grade A- or better, the Applicable Margin shall increase by an additional **1.50% per annum (the "Atmospheric Risk Premium")** until such rating is restored.

Section 2.03. Repayment of Loans. The Borrower shall repay the outstanding principal amount of the Facility Loans in quarterly installments on the last Business Day of each Martian fiscal quarter, commencing after the **Agreement Effective Date**, in accordance with the amortization schedule set forth in Schedule 2.03.

ARTICLE III: REPRESENTATIONS AND WARRANTIES

The Borrower represents and warrants to the Lenders that:

Section 3.01. Environmental Compliance on Titan. The Dome operations comply in all material respects with the Titan Ecological Protection Protocol (TEPP) of 2104. No hazardous chemical dispersion, other than permitted venting of pressurized nitrogen ballast, has occurred outside the localized collection zone.

Section 3.02. Gravity and Structural Tolerances. The structural foundations of the Dome are anchored into bedrock water-ice, engineered to withstand the gravitational shear of Saturn's tidal forces and atmospheric winds up to 120 meters per second.

ARTICLE IV: COVENANTS

Section 4.01. Affirmative Covenants. So long as any Lender shall have any Commitment hereunder, the Borrower shall:

1. **Maintenance of Pressurization:** Maintain interior atmospheric pressure at a minimum of 1.45 Earth atmospheres (147 kPa) with a gas mixture consisting of not less than 95.0% Nitrogen (N_2) and 5.0% Argon (Ar) in all habitable zones.

2. **Environmental Shielding:** Maintain and repair the active thermal-barrier pylons designed to prevent the heat generated by the industrial refining plants from melting the surrounding water-ice bedrock.

Section 4.02. Negative Covenants. The Borrower shall not, without the prior written consent of the Administrative Agent:

1. **Fundamental Changes:** Permit any merger, consolidation, or orbit-transfer of major corporate assets out of the Saturn System jurisdiction.

2. **No Liens on Life-Support Infrastructure:** Create, incur, assume, or permit to exist any Lien on any life-support systems, oxygenation scrubbing units, or nuclear fusion containment walls essential to the survival of the resident labor force.

ARTICLE V: EVENTS OF DEFAULT

Section 5.01. Events of Default. If any of the following events shall occur, the Administrative Agent may, with the consent of the Required Lenders, declare the Loans to be immediately due and payable:

1. **Atmospheric Decompression:** Any sudden decompression of the main dome structure resulting in a loss of pressurized volume exceeding 15% within any 24-hour period, or a decline in the **Atmospheric Integrity Rating** below Grade B.

2. **Bedrock Liquefaction:** Any thermal monitoring station registering bedrock water-ice temperatures above 260 Kelvin, indicating an imminent threat of structural collapse due to substrate melting.

3. **Solar Flare Abandonment:** Evacuation of more than 80% of the operational workforce due to Solar Cosmic Radiation levels exceeding 500 millisieverts per hour, if such evacuation lasts longer than 30 Earth consecutive days.

KRAKEN EXTRACTION PHASE II LP

By: _____
Name: Tarek Vance-Vargas
Title: Managing Director of Operations

Date of Execution: **June 26, 2146**

SOL-SYSTEM INFRASTRUCTURE BANK

By: _____
Name: Elizabeth Chen
Title: Vice President, Outer-Rim Debt Infrastructure

Date of Execution (the **Signature Date**): **June 26, 2146**
